Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

General Remarks

Upon careful reexamination of Applicant's claims, the Examiner believes that a restriction is in order. While Examiner has prosecuted on the merits all claims as presented in the original Application, however, based on further review and according to MPEP 811 [R-3], a restriction for the subject application would be proper and therefore Examiner respectfully requests Applicant to elect one of the Groups listed below for further prosecution on the merits.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-23, are drawn to base transceivers compiling an aggregate list of available channels for communication based on received messages from remote units indicating available clear channels and submitting list to remote transceivers, classified in class 370, subclass 450.
- II. Claims 23-31, are drawn to unlicensed base transceivers communicating in a sub-bandwidth of clear licensed channels not being used by licensed subscribers, classified in class 370, subclass 329.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2)

Art Unit: 2616

that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because wireless transceivers of Group I are not required to monitor unlicensed channels and therefore operate only within the licensed wireless channels. The subcombination has separate utility such as operation of devices utilizing unlicensed bandwidth segments within licensed channels and monitoring said licensed channels for availability for use by unlicensed devices.

The examiner has required restriction between combination and subcombination inventions. Where applicant elects a subcombination, and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Response to Arguments

Applicant's arguments, filed August 28, 2007, with respect to claims 1-31 have been fully considered, however, based on Examiners further review of subject claims, the Examiner has been withdrawn the previous rejections and requests Applicant for election of one of above Groups prior to further prosecution on the merits.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Raj K. Jain whose telephone number is 571-272-3145. The examiner can normally be reached on M-F 8-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chi Pham can be reached on 571-272-3179. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
